

## HOW TO / save sections and blocks

---

Blocks and sections can be saved for future use. This is particularly helpful with sections/blocks that you used to make a footer or a header that is used in a lot of your marketing pieces, or even a newsletter that you send out monthly. And they're super easy to save!

To save a section or a block, hover over the section or block you'd like to save while you are in the template builder. Click on the "Save" icon and then give your new section or block a name. Don't forget to click "Save"!
